

22.11.21. Visited jointly myself with Fe, Bagman today at Shinda Community Development Society (Home for disabled) at Bhenera. Met all officials attached with home. Met inmates (85 no present today). They are seen very cordial and fresh. Inspected all rooms, lavatories, kitchen regarding security matters along with Fe, Bagman. Total home is covered with CCTV in and out. Average age group of inmates are within 11 yrs. to 15 yrs. They separately stay at different floors as per age group. Food are served as per routine. Aquaguard are installed at different floors. They are also engaged with different extra curricular activities such as drawing, painting, plays drama etc. Overall Home building itself is clean. Counselors and other staff including Superintendent are very cordial with all inmates. A few suggestions are -

- Cots are too stowed, upper staircase should be barricaded.
  - Meditation and physical exercise to be practised on regular manner.
  - A Covid isolation unit - should be earmarked.
  - A habit of wearing mask among inmates, staff and cook should be developed.
  - Proper sanitization of buildings and room to be made on regular basis.
  - CCTV. Should be installed at all entry & exit point and also outside the home building and should be functional at all times.
- Wish betterment of home in progressive way.

Thanks to all.
